Dofinansowanie projektu z UE: 43 082,23 PLN

TIPS TO IMPROVE YOUR ENGLISH

1. Stop translating everything

The best thing to do is to learn how things are said in English. Translating will only make things more difficult for you.

2. Stop watching films in your own language

Get used to hearing English. Exposure to the language is very important and will certainly help you improve faster! Start watching films in English and you'll see positive results.

3. Stop trying to understand every single word

The most important thing is to understand the main idea of the texts and sentences that you're exposed to.

4. Stop overthinking

It's important to understand why things are done a certain way because it might help you remember the rules, but don't overthink things too much! Some rules are just there for no special reason. Just learn to use the grammar and sentences correctly.

5. Stop worrying about your mistakes when you speak

As long as people understand you, everything is fine. Don't waste your time thinking about your mistakes. Leave the mistakes to be corrected by your teacher in the classroom!
